Aditi Prashant

Bangalore, India — reachaditiprashant@gmail.com — +91-8861610755

Objective

Final-year Computer Science and Engineering student with experience building cloud-native, AI-driven, data-intensive, and full-stack systems using AWS, Python, machine learning, and Large Language Models. Seeking opportunities in Software Engineering, Data Engineering, Cloud Engineering, or AI-driven Product Development.

Education

Bachelor of Technology in Computer Science and Engineering **July 2026**
Manipal Academy of Higher Education, Bangalore

Relevant Coursework: Data Structures & Algorithms, DBMS, Cybersecurity, Big Data Analytics, Computer Networks, Operating Systems, Information Retrieval

Experience

Data Engineer Intern — Adept AI **2025**

- **AI Compliance Advisory Platform:** Built a serverless, multi-channel AI compliance platform using AWS and OpenAI to provide regulatory guidance and automated risk assessments for frameworks including the EU AI Act, GDPR, and ISO/IEC 42001.
- Developed a RAG architecture using **OpenAI embeddings, PostgreSQL, pgvector, and Redis**, with AWS Lambda, API Gateway, SQS, SNS, S3, and CloudFormation supporting scalable, event-driven processing.
- **TalentMatchmaker & Candidate Verification Platform:** Built an AI-powered candidate matching system processing **12,000+ candidates**, combining deterministic filtering, semantic embeddings, skill-taxonomy scoring, and multi-dimensional candidate evaluation.
- Integrated **SentenceTransformers and Anthropic Claude** for semantic matching, job-description parsing, skill and qualification validation, and explainable candidate ranking.
- **AI Job Recommendation System:** Developed a hybrid recommendation pipeline combining work authorization, location, and language filtering with vector similarity, persona-based ranking, skill matching, and preference-based weighting.
- Implemented explainable recommendation tracing with factor-level score breakdowns and responsible AI capabilities including **bias detection, fairness auditing, statistical parity, and compliance audit logging**.
- **Resume Ingestion & Processing Pipeline:** Designed a multi-tenant AWS ingestion platform supporting individual and bulk resume uploads using FastAPI, S3, SQS, ECS/Fargate, and asynchronous worker services.
- Built document extraction and OCR workflows using native parsers and **AWS Textract**, with SHA-256-based deduplication and candidate metadata storage in **Amazon Aurora MySQL**.

Projects

IoT Sensor Anomaly Detection Pipeline — MedBot Healthcare Startup **2025**
- Built an end-to-end real-time IoT monitoring pipeline using **AWS IoT Core, Kinesis, Lambda, Timestream, DynamoDB, API Gateway, and EventBridge** for sensor data processing and anomaly detection.
- Developed a React analytics dashboard for visualizing device metrics, anomalies, and alerts, and automated infrastructure deployment using **AWS CloudFormation**.

AI-Powered Healthcare Insights from Patient Audio **2025**
- Built an AI healthcare system using **OpenAI Whisper** to transcribe doctor-patient conversations and LLMs to generate structured clinical notes and prescription information.
- Implemented entity extraction for symptoms, diagnoses, medications, and dosages, with validation checks designed to improve output consistency and reduce hallucinations.

Automated Cybersecurity Threat Detection Framework **2024**
- Engineered an automated security testing and threat detection framework using **hping3**, shell scripts, and network monitoring to identify suspicious behavior and potential attacks.
- Conducted vulnerability assessments using **Nmap, Burp Suite, Wireshark, and Kali Linux**, with centralized logging and automated incident-response alerts.

Technical Skills

Programming: Python, Java, C, SQL, JavaScript, Bash
Backend & APIs: FastAPI, Flask, REST APIs, API Development, Microservices, JWT Authentication
Cloud & AWS: AWS Lambda, API Gateway, S3, SQS, SNS, DynamoDB, Aurora MySQL, RDS PostgreSQL, RDS Proxy, Kinesis, IoT Core, Timestream, EventBridge, Textract, ECS, Fargate, VPC, CloudWatch, Secrets Manager, SSM Parameter Store, ElastiCache Redis
AI & LLMs: Anthropic Claude, OpenAI APIs, OpenAI Whisper, Hugging Face, SentenceTransformers, Prompt Engineering, RAG, Semantic Search, Entity Extraction, LLM Evaluation
Machine Learning & Data: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, FAISS, Vector Embeddings, Cosine Similarity, Candidate Ranking, Anomaly Detection
Databases & Search: PostgreSQL, MySQL, Amazon Aurora, DynamoDB, NoSQL, pgvector, Vector Search
Document Processing: AWS Textract, OCR, PyPDF, python-docx, File Type Detection, SHA-256 Hashing, Data

Deduplication
DevOps & Infrastructure: Docker, AWS CloudFormation, Infrastructure as Code, Git, GitHub, GitHub Actions, CI/CD, VS Code, Google Colab
Frontend: React.js
Responsible AI: Explainable AI, Bias Detection, Fairness Auditing, Statistical Parity, Disparate Impact Analysis, Audit Logging
Cybersecurity: Nmap, Burp Suite, Wireshark, hping3, Kali Linux, Network Monitoring, Vulnerability Assessment
